Languages

Education

2014 - 2016 **MSc., Theoretical Physics**
Toronto/Waterloo, Ontario, Canada

York University, Perimeter Institute (PI)

2009 - 2014 **BSc., Physics & Philosophy**
Toronto, Ontario, Canada
Senior Thesis – Graphene: Hartree-Fock Analytics and Numerics

Trinity College, University of Toronto

Research

2014 - 2016 **Major Research Project**
inSIDious Matter

Tulin Research Group

- Phenomenological exploration of a model for an inelastic self-interacting dark matter particle with **Mathematica** and **Scipy**
- Theoretical formulation of scattering quantities by tensor calculus and numerical partial-wave analysis to determine valid parameter-space for theory.
- New efficient techniques for numerically determining scattering cross-sections in the classical regime are implemented.

Experience

Feb 2017 -
Present

Quantitative Developer - Associate
Treasury Analytics Group

TD Securities

- Thorough benchmark and stability testing of quasi-Monte Carlo methods shows marked increase in convergence speed for mortgage-backed security valuation model, allowing for Key Rate Vega and Convexity hedging (**Pandas, Matplotlib, Seaborn, C++**)
- Strengthened understanding of Financial Engineering and numerical analysis, transferring knowledge in a very successful *Lunch n' Learn*, utilising **Jupyter RISE** to deliver interactive code and live animations

Jul 2016 -
Feb 2017

Business Systems Analyst - Associate
Enterprise Fraud Analytics Program

TD Bank Financial Group

- Subject Matter Expert (SME) for Identity & Access Management. Developed Role-Based Access Management tools to automate RBAC reporting (**Pandas, Excel, Selenium**)
- Interfaced between business and Testing Centre of Excellence to facilitate continuous testing on vendor platform delivery.
- Global Knowledge training with IBM BigInsights **Hadoop** stack

Apr 2014 -
Sep 2015

Application Analyst
Equities Support

National Bank Financial Markets

- Worked on trading floor, directly interfacing with traders
- Created ETL framework and **Tableau** dashboards to provide meaningful business insights from global equities trade data, leading to the adoption of Tableau Server across the LoB
- Designed and implemented **angular.js** Big Data POC for legal compliance reporting. Consolidated data from legacy Sybase servers into local SQLite database to increase search speeds by 1000%
- Explored use cases for **Bokeh, d3.js** for visualising real-time market data
